Now showing:

#### *TurtleVision 3D*

A dazzling, animated, around the world ocean adventure, experience the ups and downs of life on land and sea in this coming of age story starring the cutest sea turtle on the 3D screen. From the warm waters of the tropics to the icy Antarctic, join Sammy and his friends on an exciting journey through truly immersive environments. Wind your way around spectacular coral reefs and enjoy a wild ride on a fun-loving octopus. Dive into icy polar waters to meet a friendly whale and get ready to face the dangers of human encounters.

#### *Dinosaurs: Giants of Patagonia*

If it weren't for a series of cataclysmic events, our planet could still be the domain of dinosaurs. Instead now we can see these extraordinary creatures through the magic of 3D. Meet the largest living animals to have ever walked the earth: the titanesque, plant-eating Argentinosaur and its nemesis, the Giganotosaur, a carnivore that could easily challenge the famous T-Rex. Deeply rooted in science, the film carries the audience back in time to witness these amazing beasts come to life.
